

# WHITEPAPER V1.04

What's the problem we are trying to solve with Viraltweet?

Twitter is an amazing resource for staying up-to-date on the latest developments in the crypto world. With millions of users posting information and insights about cryptocurrencies, it can be a great place to gather valuable data. However, this data is often spread out and fragmented, making it difficult to find the information you need when you need it.

Good tips and interesting data about cryptocurrencies can be found all over Twitter, written by different authors at different times of the day. While this variety can be a great thing, it can also make it challenging to find the information that you need to make informed investment decisions. That's why we're working to gather all of the best tweets and threads about the crypto world in one place: Viraltweet platform.

We believe that the best way to keep Viraltweet platform up-to-date and useful is to involve the community. That's why we're counting on the collective intelligence of crypto investors everywhere to help us curate the most valuable and relevant information. We're confident that with the help of the community, Viraltweet will become an indispensable resource for anyone interested in the crypto world.

So why did we name our platform Viraltweet?

The name reflects our goal of helping the best and most useful information about cryptocurrencies to spread and become viral. By gathering all of this information in one place, we hope to make it easier for people to discover and share valuable insights about the crypto world. Whether you're a seasoned investor or a beginner, we believe that Viraltweet has the potential to be a game-changer for anyone looking to stay informed about the crypto world.

## **BOOST YOUR TWEET**

The Viratweet platform is not only a place to find important information, but it is also the place where we will add products that help brands and projects to get noticed.

Boost Your Tweet is the first product we have created for the Viraltweet platform.

Crypto projects, influencers, thread authors, and anyone who wants to increase the chances that own tweet or thread will go viral can burn a certain amount of VIRAL tokens to post this tweet on the dedicated Telegram channel:

<https://t.me/+QZeVfVFL8bBkNjA0>

Users who like and retweet these tweets will earn few Mystery Boxes. Being active on the platform is another way to earn Mystery Boxes. But first, let's see how to open a Mystery Box and what it could contain.

## **HOW EARN MYSTERY BOXES**

A Mystery Box could contain from \$0 up to \$100, winners will be paid in USDT.

To open a Mystery Box, you need to burn one VIRAL token through the dedicated function on the Viraltweet platform.

VIRAL tokens can be purchased on the decentralized exchange Pancake Swap.

Users can accumulate Mystery Boxes throughout the month, but at 00:01 on the first day of each new month, all accumulated Mystery Boxes will be lost. The only way to avoid losing Mystery Boxes is to open them before the end of the month.

Besides likes and retweets, there are other actions that users can take to earn Mystery Boxes. For example, uploading interesting tweets or threads entitles one to receive Mystery Boxes, but only if the tweet is approved by the platform moderators. Here is the complete list with the respective Mystery Boxes that users can win. If the likes or retweets are removed, the corresponding Mystery Boxes will also be removed.
